

Split-Core Current Transformers

- mechanical lock
- wide range from 100 to 2500 Amp/5
- precision class 1%
- specially designed for mounting on difficult systems
- the 5 Amp-secondary winding can be used for many measuring applications

Flexible Split-Core Current Transformers (flexy clamps)

These flexible current transformers permit current measurements on large cable bundles, where standard transformers could hardly be used.

- these transformers - ranging from 500 to 3000 Amps - provide a 1Vac output
- 9V-battery power supply
- ideal for use with energy analyzers having a 1Vac input
- length: 40 cm., 80 cm.
